-

Some Major Works

- Project: Aykon City, Dubai
  Consultant: Keo
  Developer:Damac
  Type of work
  Design of foundation piles more than 50m deep [max Working load=25400 kN]

- Project: Strategic Tunnel Project, Abu Dhabi
  Consultant: CH2M Hill
  Type of work
  Design of more than 130 numbers of small diameter circular shafts [unreinforced/reinforced] using compression arch theory. Shaft dia varies between 3.90m to 12.00m. Depth vary between 10m to 27m.

- Project: Khalifa Stadium, Abu Dhabi (5000 numbers of Foundation piles)-more than 200 million AED for foundation /soil improvement works
  Consultant: Arupsport

Type of work:
Design of foundation piles, Design of Load test systems, Interpretation of Test results, Preparing of Method statements, Reports & Checking Shop drawings.

- Project: Guardian Tower, Abu Dhabi

  Consultant: Pfeiffer Engineering
  Type of work:
  Design of building pit for approximately 19m excavation [Two level of struts] with Holiday Inn Hotel building immediately next to the pit.

- Project: German Business Park, Dubai
  Consultant: Rice perry Ellis
  Type of work:
  a) Design of anchored secant pile walls , 414 lm
  b) Design of 850mm & 1500mm dia foundation piles

- Project: Al Ain Hospital, Al Ain
  Consultant: Obermeyer
  Type of work: Design of secant & sheet pile walls [1800 lm Secant Pile Wall]

- Project: Aquarius Gate, Dubai
  Consultant: Dewan Architects
  Type of work: Design of secant pile walls with 2/3anchor layers (maximum excavation of 16.7m

- Project: Botanica Towers, Dubai
  Consultant: Hyder Consulting
  Type of work: Design of cantilever secant piles for a maximum excavation of 10m

- Project: Residential villa @ Emirates Hill
  Consultant: Chawla Architecural & consulting Engineers
  Type of work: Design of Soldier piles

- Project: Tecom Project,Al Barsha
  Consultant: Dubai Consultants
  Type of work: Design of Foundation piles

- Project: Burj Holiday Tower, dubai
  Client: Khaleej Al Emrah

Type of work: Design of Foundation piles

- Project: The Pearl Project,Qater
  Type of work: Project Engineer

- Project: Jumeirah Beach Residence,Dubai
  Type of work: Project Engineer & Interpretaion of Load test reulsts & strain gauges

- Project: Bioko Island
  Type of work: Design of Foot Bridges, Steel Buildings & Hand rails

- Project: Kestral Project Dubal
  Type of work: Design of Foundation piles
- Project: Dubai Fesival City
  Type of work: Project Engineer

- Saadiyat Bridge, Abu Dhabi as a project engineer
- Al Naboodah Residential Tower, Dubai, design & supervision of load test systems.
- Novotel, Al Barsha, design of shoring, anchor & anchor stressing reports
- Dubai International Airport
- Mumbai-Pune Expressway, India
- Predesign for many tender works

I hereby declare that the above details are correct to the best of my knowledge.

DIESEL AUTO PRIMING PUMPS (4" - 100 mm)

Application / Advantage

- W&P dP-100 fitted with automatic vacuum priming system commonly used in construction projects for municipal application including irrigation and over pumping.
- Suitable for operation in high humid, hot or low temperature conditions
- Hard Wearing Materials SS 316, Cast Iron and Bronze
- Move clean & dirty water
- Automatic Priming and re-priming
- Surge Protection System - prevents water escaping and damaging exhauster
- Improved guard design - More Safety, Less Vibration & Noise
- Better Suction lift, efficient water handling
- Sound reduction canopy (Optional)

DIESEL AUTO PRIMING PUMPS (4" - 100 mm)

SUPPLIERS TO MUNICIPALITIES, OIL & CONSTRUCTION, PROCESS INDUSTRIES, AGRICULTURE AND MINE INDUSTRIES

Specification/Performance Data

Our Track

Over 15 years of superb experience enable us to execute various construction projects for dewatering, irrigation, mining, sewage over pumping and emergency water pumping.

Solid Design

Robust design enables easy handling and maintenance. Careful development and testing of pumps facilitate high suction lift and minimize damage to the internals. Lateral volute discharge minimize cavitation in volute to get more life improved pump efficiency.

Power Unit

Choice of diesel engines, air cooled / water cooled Deutz, Lister, Lombardini, Kirloskar, other operating between 1500 and 2000 rpm. Alternative 4 pole electric motors also available.

Fuel Tank Capacity

180 ltr with cleaning facility

Pump Performance

Max Head	: 40m
Max Flow	: 180M^3/hour
Max Solid	: 38mm
Suction Head	: 8 mtr

Suction & Discharge

Suction flange : 100mm PN16
Discharge flange: 100mm PN16
Quick acting coupings optional

Main Components

Volute	: SG/Cast Iron/3 6 SS
Impeller	: Bronze/316SS
Shaft	: 304/316 SS

Weight

dp 100 SE	741 Kgs
dp 100 HE	811 Kgs

Chassis

4 wheel site trailer, 2 wheel road trailer or skid mount

Vacuum System

Vacuum pump for automatic PRIMING & REPRIMING AT 70 CFM.

Shaft Seal

Mechanical seal designed for long life when used for sandy sea water.

As we are constantly endeavouring to improve the performance of our products/equipment, we reserve the right to make alterations from time to time, and as such our products/equipment may differ from that detailed in this publication. HYDRAULIC/PNEUMATIC DRIVE DRILL
(Up to 36" - 900 mm hole size)

Specification/ Performance Data

- **DP - HYDRAULIC POWERED DRILL MACHINES**

  Heavy Duty drill machines used extensively for construction tasks. Readily fitted as an attachment to cranes, excavators and trucks. Standard and heavy duty models provide an economical solution to all general purpose vertical drilling requirements. Efficient performance, high return on capital, and low running cost make these drills a favorite with users.

- Wide Application - Ensures maximum utilization within differing construction requirements. Pneumatic hammer compatible.
- Extensive range - Covers differing hole diameters and depths.
- Simple Installation - Can be fitted easily to various equipments in a short time
- Variable Strokes - Up to 7M at one operation decreases construction time.
- Long Term Reliability - Reduces maintenance costs.
- Hard wearing materials - Extensive use of 316 SS on wearing parts assists long operational life.
- Use of lift machine hydraulics eliminates the need for an additional power pack.
- Simple Operating Procedures allow fast operator familiarity.
- Spare Parts Convertability allows common parts to be used on different machines.

HYDRAULIC/PNEUMATIC DRIVE DRILL
(Up to 36" - 900 mm hole size)

SUPPLIERS TO PROCESS INDUSTRIES, CONSTRUCTION, PETROCHEMICAL PLANTS, MUNICIPALITIES AND AGRICULTURE

Specification/Performance Data

Robust Efficient Design

Heavy duty construction using well proven and uncomplicated design - Readily maintained without specialist support 316 Stainless and other hard wearing steels used extensively to provide adequate safety factors during use.

Extensive Range of Applications

The ease with which the drill may be fitted o a wide variety of lifting machines (Cranes, Excavators, Backhoes etc.) enables it to be simply fitted to such equipment on different sites. Flexible mounting on different machines allows the drill to carry out different tasks. Typical applications include constructing boreholes for geo-technical investigations, installing wellpoints used during dewatering, drilling foundation holes for electricity & telephone poles, and establishing wells.

High Performance

Option of two sizes of hydraulic motor configuration suitable for standard and heavy duty applications - hole sizes up to 300 mm with model DP - 400 ST and up to 900 mm with model DP - 400 HD. Maximum depth of drilling 30M (6" auger)

Installation

The drill head is suspended on the end of the lift machine boom or dipper by 2 articulating lirks. The drill is connected to the machine hydraulics by three hoses, running along the side of the boom / dipper structure.

Materials of Construction

Hydraulic Motor	Eaton or similar
Steel	316 SS for wearing parts

Parts Convertability

W&P consumables are suited for use on a wide range of drills supplied by different manufacturers.

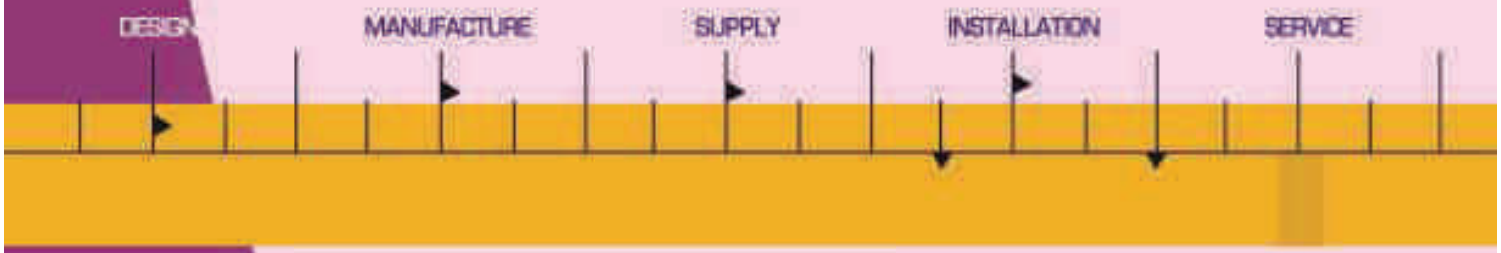
ELECTRIC SUBMERSIBLE BOREHOLE PUMPS 4" TO 8" (100-200 mm) SIZE

Specification/Performance Data



Broad Experience
45 years background experience - extensively used in water supply projects either for domestic or agricultural needs. Also used in an increasing number of industrial applications - used extensively to control ground water during dewatering works.

Robust Efficient Design
Heavy duty construction using well proven and uncomplicated design - Readily maintained without specialist support. Alternative materials include Steel, Nonyl & Bronze.

High Performance
Available with flows up to 140M³/hour (8"), 60M³/hour (6") and 14M³/hour (4"). Operating heads up to 500M. Individual pump specifications for each application optimize efficiency.

EXCELLENT ECONOMICS
Low Power Consumption
Rewindable Electric Motors
Low Spare Parts Cost

PUMP RANGE

Group	4"	6"	8"
Max Head (M)	600	580	400
Max Flow (M3/hour)	14	60	290

MATERIALS OF CONSTRUCTION
SS 316 & 304, Bronze, Cast Iron, and Nonyl (4" size Pumps only). Component materials are listed for each offer.

OPTIMIZED SPECIFICATION
Within each of the pump sizes (4" to 8") there are a large range of different pump and motor combinations from which the optimum combinations to suit a specified duty can be selected.

ELECTRIC MOTORS
Water filled and cooled. Stator winding protected with water proof insulation. Thrust and journal bearings water lubricated. Anti Freeze agent added for low temperature applications.

WATER SPECIFICATION
DW borehole pumps are designed to operate in clean water with pH between 6 & 8. Water conditions, generally following the guidelines below, will provide optimum operating conditions for the pump.

Temperature	33°C
Sand content	50 grams /M³
Chlorine	500 ppm
S. G	1.004
Viscosity	1.75 x 10 M²/ Sec
Turbidity	50 ppm silica scale

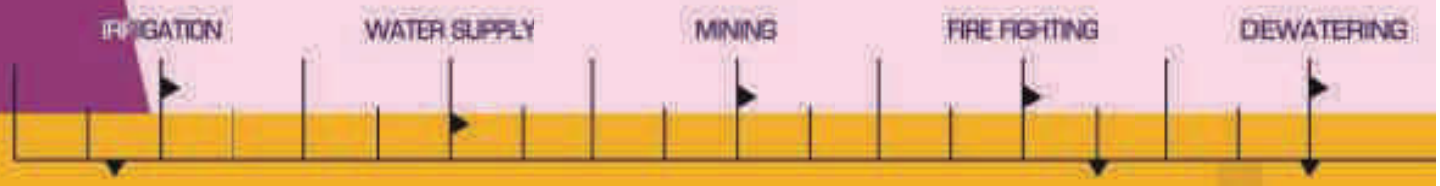
Specification/Performance Data



DW ELECTRIC BOREHOLE PUMPS

Tough reliable borehole pumps used extensively for pumping water.
High level efficient performance and simple well proven design make these pumps a favourite with users who require high utilization and low running cost.

- Wide Application - Meet Domestic, Agricultural, Municipal and Industrial needs
- Extensive range - 4", 6" & 8" pumps to suit wide range of different head & flow
- High Flow Capacity - Up to 140 M3/hour
- High head options - Up to 500M
- Alternative materials - allow selection to suit water conditions (Stainless Steel, Bronze, Noryl)
- In House motor build - Permits choice of optimum power rating to meet each application.
- Quality Control - Manufactured under ISO 9001 certification

Wide Application

Extensively used for dewatering of construction projects, supply of water from irrigation wells, and for general sump pumping - Readily portable, these pumps can be moved between sites to meet differing requirements.

Robust Efficient Design

Heavy duty construction, using well proven uncomplicated design - Double casing water jacket provides continuous motor cooling.

Top discharge reduces pump dicmeter safety features includes cut-outs to protect against over heating and excessive motor current.

High Performance

Available from a range of different models to suit required flow & head.

Available with automatic system to control water level in sumps or pits (optional).

Power Units

Dry run asynchronous motor. 3ph 2pole 50Hz (2850rpm) or 60Hz (3450rpm). IP68 Protection Class F insulation. Single phase option 1.5kw motor. 220/380/440 V supply.

Materials

Standard specification incudes Stainless Steel inner & outer casings, high chrome impeller cast iron volute Alternative optional material specifications (SS31 6L etc).

Shaft Seal

Twin oil bath mechanical seal arrangement. Upper seal Carbon / Ceramic Lower seal Silicon Carbide / Silicon Carbide.

Application / Advantage

ELECTRIC SUBMERSIBLE PUMPS (2"-50mm TO 6"-150mm)

- **ES SERIES ELECTRIC SUBMERSIBLE PUMPS**

  Low and medium flow pumps used extensively by Contractors, Municipalities, and in Agriculture for irrigation. Efficient performance and simple design make these pumps a favorite with users. The pumps are adaptable for use in a broad range of different applications; and provide high utilization, high return on capital, and low running costs.

- Wide application - Move clean and dirty water
- Hard wearing materials - Cast Iron, Chromium and stainless steel.
- Robust construction - well suited for use on construction sites.
- No priming required - pump located at the water source.
- Operate unattended for long periods.
- Minimal noise due to electric motor power source.
- Ideal pump for use with dewatering system.
- Alternative high & low head / flow within the different models.

HIGH PRESSURE WATER PUMPS

SUPPLIERS TO MUNICIPALITIES, OIL & CONSTRUCTION, PROCESS INDUSTRIES, AGRICULTURE AND MINE INDUSTRIES

Broad Experience

30 years background experience extensively used by construction projects for wellpoint installation and short run dewatering by Municipalities and General Industry for cleaning and auxiliary fire protection.

Power units (Diesel)

Deutz, Lister and other, operating at speeds of up to 3000rpm

Robust Efficient Design

- Heavy duty construction using well proven and uncomplicated design
- Readily maintained without specialist support
- Cast Iron, Bronze, and Stainless Steel materials.

Power units (Electrical)

2 pole motors, running at 2960 rpm, 380/410V, 3ph, 50 or 60Hz

High Performance

Available with alternative flows of up to 80m³ per hour (Model Jp 100) and 60m³ per hour (Model JP 75). Maximum operating head 55m. Well Suited to operation in high humidity, tropical or low tempature artic conditions.

Pump Performance

Max Head: 100m
Max Flow: 160m³/ Hour

Automatic Priming (Optional)

Vacuum priming by oil lubricated rotary sliding vane pump. High air handing capacity extands the pump use to well pointing and sump pumping.

Pipe Connection

Suction: 100mm / 80mm
Discharge: 100mm / 80mm

Materials

Volute: SG Cast orn/316 SS
Impeller: SG Cast Iron / Bronze

Weight

SEDIMENT CLEARING

Specification / Performance Data

SUPPLIERS TO MUNICIPALITIES, OIL & CONSTRUCTION, PROCESS INDUSTRIES, AGRICULTURE AND MINE INDUSTRIES

Broad Experience

W&P have more than thirty years experience in meeting a wide range of pumping needs. They provide a complete pump range using surface or submerged water pumps, respectively diesel engine or electric motor powered, and are a leading supplier of ground dewatering technology & related equipment. The W&P cleaning system is specifically designed to pump liquids containing high percentages of solids and where conventional pumping either by electric submersible pump or surface mounted sump pump are ineffective. The W&P is used extensively to clean out accumulated sediment from lagoons used for sewage aeration and storage of chemical discharge; for removal of build up of sand in estuaries & docks; and for removing sea bed build up at the entrance to sea intake structures.

Related Inspection

Many locations with sediment build up require detailed inspection of the site condition to establish the amount of material requiring removal to clean the area. Calculations are made of the volume of sediment / sludge to be removed & the time factor involved in executing the works. Where the pumped material is to be moved a considerable distance from the site additional booster pumps are installed in the discharge line. In the case of undersea structures such as sea intakes the site is video inspected before cleaning, any required repairs are organised, and future video inspection is made after completion of the works.

High Pump Performance

The unique capability of the centripetal pump mixes the solids and surrounding liquid into a mobile mass suitable to be pumped and allows the rate of pumping to far exceed any of the more conventional pump systems. W&P 4" unit is used for all general applications and larger 6" unit is used for high head / flow applications.

Technical Details

Pump Type	W&P Centripetal, 4" or 6" size.
Drive	Hydraulic hoses from Power Unit to pump
Solids content	Up to 50%
Maximum Head	Up to 40 M
Maximum Flow	Up to 400 M^3 / hour
Power unit	Diesel engine powered hydraulic motor
	4" ..... 45 KW @ 2000 rpm
	6" ..... 75 KW @ 2000 rpm

Note : Pump performance varies with density of liquid.

W&P 4"-6"

SEDIMENT CLEARING

A complete inspection & pumping system purpose designed for cleaning out lagoons, silted up water ways, estuaries, sea water intakes, and other sites where there is a need to pump water containing a high percentage of solics. The purpose designed W&P pump uses contra rotating impellers that dig in and mobilize accumulated solids converting them into a fluid mass which can be mobilized & removed by the pump. Driven by a powerful hydraulic motor the pumped material is transferred to the discharge location by standard pipes. This system is increasingly used by large municipal & industrial corporations to maintain their lagoon storage facilities clear of excessive sediment build up and their sea intakes in good operating condition.

CENTRIPETAL PUMP SYSTEM

Moves liquids with up to 50% solids

HYDRAULIC DRIVE

Safe, avoiding under water mains electrics

REDUCES COST SUBSTANTIALLY

Up to 200% improvement in execution of the work

MOVES SLUDGES BY PUMP

No need for vehicle transportation

VIDEO INSPECTION

Provides pre & post contract inspection
